

WEBSITE CHECKLIST

Tips you need to get started

Here are some things you need to get started. You can provide this information to your web designer so it will help you to get started with the design of your website.

WHO IS YOUR NICHE

Who is your audience who are you selling too. Are you selling younger people are selling just women. Or are you selling to everyone?

DOMAIN NAME

When choosing a business name and domain that represents your brand. A name that is unique and so when your website is built your customers see how unique your businesses are not cookie cutter businesses.

WEB HOSTING

Research your web hosting services that you want to have your website built on. Ask your web designer if they can suggest the best one or what company do they use.

IMAGES

When you provide your designer with images give them images that have good resolution and not images that you took from another site or purchase photo stock images.

CONTENT

When you are ready to have a website built make sure you have all of your content, prices for your website. If you have problem writing content. Ask your designer if she has a content writer.

COLOR

Do you know your colors for your website set down and work that out with your designer.

E-COMMERCE-OR SERVICE

Are your E-Commerce or a Service base website do you know how many pages you will need for the product or service information to provide to your clients
